

**L-42- Valuation Basis (Life Insurance - Individual )**  
**Chapter on Valuation Basis**

**a. How the policy data needed for valuation is accessed ?**

The required data for valuation in respect of each policy is extracted Branch-wise from policy masters maintained at each Divisional Office. The data extracted in respect of individual policies is checked for consistency and validated by a software developed for this purpose. The validated data is consolidated at Divisional Office level itself and further consolidated at Zonal Office level for offices under its jurisdiction. All such files are sent to Corporate Office for further processing.

**b. How the valuation bases are supplied to the system ?**

Once the valuation parameters are decided they are keyed in to the system to create explicit parameter file, in a form compatible to the system. The program for calculating reserves takes input from two files, viz. parameter file and policy data file.

I) Interest : Maximum and minimum interest rate taken for each segment	2017-18: Qtr ending 31.12.2017	
	Max	Min
1. Life- Participating policies	8.00% p.a.	6.90% p.a.
