

**LIFE INSURANCE CORPORATION (LANKA) LIMITED**

**FINANCIAL STATEMENTS**

**31 DECEMBER 2025**

DNG/SJS/JJ

**INDEPENDENT AUDITOR'S REPORT  
TO THE SHAREHOLDERS OF LIFE INSURANCE CORPORATION (LANKA) LIMITED**

**Report on the Audit of the Financial Statements**

***Opinion***

We have audited the financial statements of Life Insurance Corporation (Lanka) Limited ("Company"), which comprise the statement of financial position as at 31 December 2025, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2025 and of its financial performance and its cash flows for the year then ended in accordance with Sri Lanka Accounting Standards.

***Basis for opinion***

We conducted our audit in accordance with Sri Lanka Auditing Standards ("SLAuSs"). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics for Professional Accountants issued by CA Sri Lanka (Code of Ethics) and we have fulfilled our other ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

***Responsibilities of management and those charged with governance for the financial statements***

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with Sri Lanka Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

(Contd...2/)

Shape the future  
with confidence

### ***Auditor's responsibilities for the audit of the financial statements***

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SLAuSs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SLAuSs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

#### Report on other legal and regulatory requirements

As required by section 163 (2) of the Companies Act No. 07 of 2007, we have obtained all the information and explanations that were required for the audit and, as far as appears from our examination, proper accounting records have been kept by the Company.

As required by Section 47(2) of the Regulation of Insurance Industry Act, No.43 of 2000, as far as appears from our examination, the accounting records of the Company have been maintained in the manner required by the rules issued by the Insurance Regulatory Commission of Sri Lanka, so as to clearly indicate the true and fair view of the financial position of the Company.

As further discussed in Note 4.7.1 in the financial statements, the Company had not met the Solvency Margin (Risk Based Capital Rules) in the 1<sup>st</sup> quarter of 2025 (Total Available Capital Rs. 465,383,000) as per the Regulation of Insurance Industry Act No 43 of 2000 ("Act") and amendments thereto for the year ended 31<sup>st</sup> December 2025. Total Available Capital has been complied for the 2<sup>nd</sup>, 3<sup>rd</sup> and 4<sup>th</sup> quarter of the year 2025.

The accounting policies and notes on pages 08 through 57 form an integral part of the financial statements.

**1. CORPORATE INFORMATION**

**1.1 Reporting entity**

Life Insurance Corporation (Lanka) Limited, (“the Company”) is a public company incorporated on 7 October 2002 and domiciled in Sri Lanka. The registered office is situated at No. 65, Braybrooke Place, Colombo 02 and the principal place of business is situated at 29/2, Sharnell Building, Visaka Road, Colombo 04.

**1.2 Principal Activities and Nature of Operations**

The principal activity of the Company is life insurance business.

There were no significant changes in the nature of the principal activities of the Company during the financial year ended 31 December 2025.

**1.3 Parent Entity and Ultimate Parent Entity**

The Company is 97.22% owned by Life Insurance Corporation of India which is the immediate and ultimate holding company.

**1.4 Number of employees**

The staff strength of the Company as at 31 December 2025 was 87 (2024 was 99).

**2. BASIS OF PREPARATION**

**2.1 Statement of compliance**

The Financial Statements of the Company which comprise the statement of financial position, statement of profit or loss and other comprehensive income, statement of changes in equity, statement of cash flows and notes thereto have been prepared in accordance with the Sri Lanka Accounting Standards (SLFRSs and LKASs) laid down by the Institute of Chartered Accountants of Sri Lanka, and comply with the requirements of Companies Act No 7 of 2007 and the Regulation of Insurance Industry Act, No. 43 of 2000.

**Approval of financial statements**

The Board of Directors of the Company is responsible for the preparation and presentation of the Financial Statements as per the provisions of the Companies Act No. 07 of 2007 and Sri Lanka Accounting Standards (SLFRSs and LKASs).

The financial statements for the year ended 31 December 2025 were authorized for issue by the Directors on 24 March 2026.

**2.2 Basis of Measurement**

The Financial Statements have been prepared on the historical cost basis and applied consistently with no adjustments being made for inflationary factors affecting the Financial Statements, except for the following;

- Financial instruments classified as fair value through profit or loss are measured at fair value (Note 3.2)
- Available-for-sale financial assets are measured at fair value (Note 3.2)
- Life insurance fund has been measured at actuarially determined values (Note 3.9)
- Liability for defined benefit obligations is recognized at the present value of the defined benefit Obligation (Note 3.10.3)
- Fair value of land and building held as investment property. (Note 3.6)
- Going concern basis for accounting

**2.3 Functional and presentation currency**

The Financial Statements are presented in Sri Lankan Rupees, which is the Company's functional currency.

**2.4 Use of Estimates and Judgments**

The preparation of Financial Statements in conformity with Sri Lanka Accounting Standards requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected.

Information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the Financial Statements are described in the relevant notes as follows;

#### 2.4.1 Significant accounting judgements

Information about judgments made in applying accounting policies that have the most significant effects on the amounts recognised in these Financial Statements are as follows:

- Lease terms-Extension option- (Note 3.5)
- Classification of financial assets (Note 3.2)
- Classification of insurance, reinsurance and investment contracts: assessing whether the contract transfers significant insurance risk and whether an insurance contract contains direct participation features (Note 3.1)

#### 2.4.2 Accounting assumptions and estimate uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in material adjustments for the year ended 31 December 2025 are included in the following notes. Insurance contract liabilities and key actuarial assumptions (Note 3.9)

- Liability Adequacy Test (LAT) (Note 3.9)
- Fair value of land and building classified as investment property (Note 07)
- Measurement of defined benefit obligation: key actuarial assumptions (Note 3.10.3)
- Recognition of deferred tax asset (Note 3.19.2)

#### 2.4.3 Insurance Contract Liabilities

The valuation of the Long-Term insurance business as at 31st December 2025 was carried out by the Consultant Actuary based on the assumptions set out in Note 15.1 to the Financial Statements.

#### 2.5 Materiality and Aggregation

Each material class of similar items is presented separately in the financial statements. Items of a dissimilar nature or function are presented separately unless they are immaterial as permitted by the Sri Lanka Accounting Standards.

#### 2.6 Foreign currency transactions

All foreign exchange transactions are converted to the functional currency, at the rates of exchange prevailing at the time the transactions were affected. Insurance contracts which were underwritten in foreign currency are converted to functional currency at the rates of exchange prevailing at the time of underwriting and Revenue is recognized accordingly.

Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on retranslation are recognized in profit or loss.

### 3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all periods presented in these Financial Statements, unless otherwise indicated.

#### 3.1 Insurance contracts

As permitted by SLFRS 4 Insurance Contracts, the Company continues to apply the existing accounting policies for Insurance Contracts that were applied at the time of adoption of SLFRS.

##### Product classification

SLFRS 4 requires contracts written by insurers to be classified as either “insurance contracts” or “investment contracts” depending on the level of insurance risk transferred.

Insurance contracts are those contracts when the Company (the insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policy holders. As a general guideline, the Company determines whether it has significant insurance risk, by comparing benefits paid with benefits payable if the insured event did not occur. Insurance contracts can also transfer financial risk.

Investment contracts are those contracts that transfer significant financial risk and no significant insurance risk. Financial risk is the risk of a possible future change in one or more of a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of price or rates, credit rating or credit index or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or expire. Investment contracts can, however, be reclassified as insurance contracts after inception if insurance risk becomes significant.

All the products sold by the Company are insurance contracts and therefore classified as Insurance contracts under the SLFRS 4 – Insurance Contracts. Thus, the Company does not have any investment contracts within its product portfolio as at the balance sheet date.

##### Liability Adequacy Test (LAT)

At each reporting date, an assessment is made of whether the recognized life insurance liabilities are adequate by using an existing liability adequacy test as laid out under SLFRS 4. The liability value is adjusted to the extent that it is insufficient to meet future benefits and expenses. In performing the adequacy test, current best estimates of future contractual cash flows, including related cash flows such as claims handling and policy administration expenses, policyholder options and guarantees, as well as investment income from assets backing such liabilities, are used.

#### 3.2 Financial instruments

The Company classifies on-derivative financial assets into the following categories: financial assets at fair value through profit or loss, held-to-maturity financial assets, loans and receivables and available-for-sale financial assets.

The Company classifies non-derivative financial liabilities into the other financial liabilities’ category.

**3.2.1 Non-derivative financial assets and financial liabilities – Recognition and de- recognition**

The Company initially recognizes loans and receivables and debt securities issued on the date when they are originated. All other financial assets and financial liabilities are initially recognized on the trade date.

The Company de-recognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred, or it neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control over the transferred asset. Any interest in such de-recognized financial assets that is created or retained by the Company is recognized as a separate asset or liability.

Financial assets and financial liabilities are offset, and the net amount presented in the statement of financial position when, and only when, the Company has a legal right to offset the amounts and intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

**3.2.2 Non-derivative financial assets –Measurement**

Financial assets at fair value through profit or loss	A financial asset is classified as at fair value through profit or loss if it is classified as held-for-trading or is designated as such on initial recognition. Directly attributable transaction costs are recognized in profit or loss as incurred. Financial assets at fair value through profit or loss are measured at fair value and changes therein, including any interest or dividend income, are recognized in profit or loss.
Held-to-maturity financial assets	These assets are initially recognized at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortized cost using the effective interest method.
Loans and receivable	These assets are initially recognized at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortized cost using the effective interest method. Loans and receivables comprise cash and cash equivalents, staff loans, and policy holder loans, including related party receivables. Quoted debentures have been classified as loans and receivables by considering the inactive nature, i.e. breadth and depth of the market.
Available-for-sale financial assets.	These assets are initially recognized at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at fair value and changes therein, are recognized in other comprehensive income and accumulated in the fair value reserve. When these assets are derecognized, the gain or loss accumulated in equity is reclassified to profit or loss.

**Reinsurance**

The Company cedes insurance risk in the normal course of business to recognized reinsurers through formal reinsurance arrangements.

Reinsurance assets include the balances due from reinsurance companies for paid and unpaid losses and loss adjustment expenses. Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision or settled claims associated with the reinsurer’s policies and are in accordance with the related reinsurance contract.

Reinsurance is recorded gross in the statement of financial position unless a right to offset exists.

Reinsurance assets are reviewed for impairment at each reporting date, or more frequently, when an indication of impairment arises during the reporting year. Impairment occurs when there is objective evidence as a result of an event that occurred after initial recognition of the reinsurance asset that the Company may not receive all outstanding amounts due under the terms of the contract and the event has a reliably measurable impact on the amounts that the Company will receive from the reinsurer. The impairment loss, if any is recorded in profit or loss.

Ceded reinsurance arrangements do not relieve the Company from its obligations to policy holders. Reinsurance assets or liabilities are de-recognized when the contractual rights are extinguished or expire or when the contract is transferred to another party.

#### ***Premium Receivable***

Insurance receivables are recognized when due and measured on initial recognition at the fair value of the consideration receivable. Collectability of premiums is reviewed on an ongoing basis.

The Company decided to account for life insurance premiums on accrual basis in accordance with Sri Lanka Accounting Standards. Accordingly, due Life Insurance premiums (only the premiums due in the 30day grace period) are recognized at each reporting date and will be reversed if the premiums are not settled during the subsequent month, and thus the policies will be lapsed as per the Company policy.

#### ***Cash and cash equivalents***

Cash and cash equivalents comprise cash balances and call deposits with original maturities of three months or less. Bank overdrafts that are repayable on demand form an integral part of the Company's cash management, are included as a component of cash and cash equivalents for the purpose of the statement of cash flow.

### **3.2.3 Non-derivative financial liabilities --Measurement**

Non-derivative financial liabilities are initially recognized at fair value less any directly attributable transaction costs. Subsequent to initial recognition, these liabilities are measured at amortized cost using the effective interest method.

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognized and the maturity amount, minus any reduction for impairment.

### **3.2.4 Fair Value Measurement**

SLFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

A Fair value measurement requires an entity to determine all the following,

1. the particular asset or liability that is the subject of the measurement
2. for an on-financial asset, the valuation premise that is appropriate for the measurement (consistently with its highest and best use)
3. the principal (or most advantageous) market for the asset or liability
4. the valuation technique(s) appropriate for the measurement, considering the availability of data with which to develop inputs that represent the assumptions that market participants would use when pricing the asset or liability and the level of the fair value hierarchy within which the inputs are categorized.

Fair value is a market-based measurement, not an entity-specific measurement. For some assets and liabilities, observable market transactions or market information might be available. For other assets and liabilities, observable market transactions and market information might not be available. However, the objective of a fair value measurement in both cases is the same to estimate the price at which an orderly transaction to sell the asset or to transfer the liability would take place between market participants at the measurement date under current market conditions (i.e. an exit price at the measurement date from the perspective of a market participant that holds the asset or owes the liability).

When a price for an identical asset or liability is not observable, an entity measures fair value using another valuation technique that maximizes the use of relevant observable inputs and minimizes the use of unobservable inputs. Because fair value is a market-based measurement, it is measured using the assumptions that market participants would use when pricing the asset or liability, including assumptions about risk. As a result, an entity's intention to hold an asset or to settle or otherwise fulfill a liability is not relevant when measuring fair value.

When an asset is acquired or a liability is assumed in an exchange transaction for that asset or liability, the transaction price is the price paid to acquire the asset or received to assume the liability (an entry price). In contrast, the fair value of the asset or liability is the price that would be received to sell the asset or paid to transfer the liability (an exit price).

When transaction price provides the best evidence of fair value at initial recognition, the financial instrument is initially measured at the transaction price and any difference between this price and the value initially obtained from a valuation model is subsequently recognized in profit or loss on an appropriate basis over the life of the instrument but not later than when the valuation is supported wholly by observable market data or the transaction is closed out.

### 3.2.5 Determination of Fair values

The determination of fair value for financial assets and liabilities for which there is no observable market price requires the use of valuation techniques. For financial instruments that trade infrequently and have little price transparency, fair value is less objective, and requires varying degrees of judgment depending on liquidity, concentration, uncertainty of market factors, pricing assumption and other risks affecting the specific instrument.

Level 1 - Fair value measurements using quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2-Fair value measurements using inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e.as prices) or indirectly (i.e. derived from prices); and

Level 3 - Fair value measurements using inputs for the asset or liability that are not based on observable market data (i.e. unobservable inputs).

### 3.2.6 Amortised cost measurement

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortization using the effective interest method of any difference between the initial amount recognized and the maturity amount, minus any reduction for impairment.

**3.2.7 Reclassification**

Reclassifications of financial assets, other than as set out below, or of financial liabilities between measurements categories are not permitted following initial recognition.

Held for trading non-derivative financial assets are transferred out of the held at fair value through profit or loss category in the following circumstances: to the available-for-sale category, where, in rare circumstances, they are no longer held for the purpose of selling or repurchasing in the near term; or to the loan and receivables category, where they are no longer held for the purpose of selling or repurchasing in the near term and they would have met the definition of a loan and receivable at the date of reclassification and the Company has the intent and ability to hold the assets for the foreseeable future or until maturity.

Financial assets are transferred out of the available for-sale category to the loan and receivables category where they would have met the definition of a loan and receivable at the date of reclassification and the Company has the intent and ability to hold the assets for the foreseeable future or until maturity.

Held-to-maturity assets are reclassified to the available-for sale category if the portfolio becomes tainted following the sale of other than an insignificant amount of held-to-maturity assets prior to their maturity.

Financial assets are reclassified at their fair value on the date of reclassification. For financial assets reclassified out of the available-for-sale category into loans and receivables, any gain or loss on those assets recognized in shareholder's equity prior to the date of reclassification is amortised to the profit or loss over the remaining life of the financial asset, using the effective interest method.

**3.3 Impairment**

**3.3.1 Non-derivative financial assets.**

Financial assets not classified at fair value through profit or loss, are assessed at each reporting date to determine whether there is objective evidence of impairment.

Objective evidence that financial assets are impaired includes default or delinquency by a debtor, restructuring of an amount due to the Company on terms that the Company would not consider otherwise, indications that a debtor or issuer will enter bankruptcy, adverse changes in the payment status of borrowers or issuers, the disappearance of an active market for a security; or observable data indicating that there is a measurable decrease in the expected cash flows from a group of financial assets.

In addition, for an investment in an equity security, a significant or prolonged decline in its fair value below its cost is objective evidence of impairment.

Financial assets measured at amortised cost	The Company considers evidence of impairment for these assets at both an individual asset and a collective level. All individually significant assets are individually assessed for impairment.
Available-for-sale financial assets	Impairment losses on available-for-sale financial assets are recognized by reclassifying the losses accumulated in the fair value reserve to profit or loss. The amount reclassified is the difference between the acquisition cost (net of any principal repayment and amortization) and the current fair value, less any impairment loss previously recognized in profit or loss. If the fair value of an impaired available-for-sale debt security subsequently increases and the increase can be related objectively to an event occurring after the impairment loss was recognized, then the impairment loss is reversed through statement of profit or loss; otherwise, it is reversed through OCI.

### 3.3.2 Non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount. Impairment losses are recognized in profit or loss.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized

### 3.4 Property, Plant and Equipment

#### 3.4.1 Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that asset.

When parts of an item of property or equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

The gain or loss on disposal of an item of property and equipment is determined by comparing the proceeds from disposal with the carrying amount of the item of property and equipment, and is recognised in other income/other expenses in profit or loss.

#### 3.4.2 Subsequent costs

The cost of replacing a component of an item of property or equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is derecognised.

The costs of the day-to-day servicing of property and equipment are recognised in profit or loss as incurred.

#### 3.4.3 Depreciation

The Company provides depreciation from the date the assets are available for use up to the date of disposal, at the following rates on a straight-line basis over the periods appropriate to the estimated useful lives of the different types of assets.

The estimated useful lives for the current and comparative years as follows:

Furniture and fittings	5 years
Office equipment	5 years
Name boards and signboards	3 years
Motor vehicles	4 years
Computer hardware	3 years
Electric fittings	3 years
Lease hold improvements (Fixtures)	Based on Lease Agreement period

The assets' residual values, useful lives and methods of depreciation are reviewed, and adjusted if appropriate, at each financial year end.

#### 3.4.4 De-recognition

The carrying amount of an item of Property, Plant and Equipment is de-recognised on disposal or when no future economic benefits are expected from it. The gain or loss arising from de-recognition of an item of Property, Plant and Equipment is included in profit or loss when the item is de-recognised.

#### 3.4.5 Revaluation

Land and building owned by the Company is re-valued to ensure the carrying amounts do not differ materially from the fair values at the reporting date. On revaluation of an asset, any increase in the carrying amount is recognized in other comprehensive income and accumulated in equity, under revaluation reserve or used to reverse a previous revaluation decrease relating to the same asset, which was charged to the statement of comprehensive income. Any decrease in the carrying amount is recognized as an expense in the statement of comprehensive income or debited in the other comprehensive income to the extent of any credit balance existing in the capital reserve in respect of that asset. The decrease recognized in other comprehensive income reduces the amount accumulated in equity under revaluation reserves. Any balance remaining in the revaluation reserve in respect of an asset is transferred directly to retained earnings on retirement or disposal of the asset.

#### 3.5 Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for a consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assess whether:

- The contract involves the use of an identified asset—this may be specified explicitly or implicitly and should be physically distinct or represent substantially all the capacity of a physically distinct asset. If the supplier has substantive substitution right, then the asset is not identified;
- The Company has the right to obtain substantially all of the economic benefits from the use of the asset throughout the period of use; and
- The Company has the right to direct the use of the asset. The Company has the right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used.

##### As a lessee

At inception or on reassessment of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for leases of land and buildings in which it is a lease, the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

The company determines its incremental borrowing rate by obtains interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of asset leased.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is re-measured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The company presents right-of-use assets that do not meet the definition of investment property in right-to-use asset and lease liabilities in trade and other payables in the statement of financial position.

#### **Short-term leases and leases with low-value assets**

The Company has elected not to recognise right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets, if any. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

### **3.6 Investment Property**

Investment property is initially measured at cost and subsequently at fair value with any change therein recognised in profit or loss.

Any gain or loss on disposal of investment property (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognised in profit or loss. When investment property that was previously classified as property, plant and equipment is sold, any related amount included in the revaluation reserve is transferred to retained earnings.

Rental income from investment property is recognised as other revenue on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

### **3.7 Intangible assets -Software**

#### **3.7.1 Basis of recognition**

An intangible asset is recognized if it is probable that future economic benefits that are attributable to the asset will flow to the entity and the cost of the asset can be measured reliably.

All computer software cost incurred, licensed to be used by the Company, which are not integrally related to associated hardware, which can be clearly identified, reliably measured and it's probable that they will lead to future economic benefits, are included in the balance sheet under the category intangible assets and carried at cost less accumulated amortization and any accumulated impairment losses.

#### **3.7.2 Subsequent Expenditure**

Subsequent expenditure on software assets is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

#### **3.7.3 Amortisation**

Amortisation is recognized in profit or loss on a straight-line basis over the estimated useful life of the software, from the date that it is available for use since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life of software is three years.

Amortisation methods, useful lives and residual values are reviewed at each financial year- end and adjusted if appropriate.

#### **3.7.4 De-recognition**

An Intangible Asset is de-recognized on disposal or when no future economic benefits are expected from it. The gain or loss arising from the de-recognition of such Intangible Assets is included in profit or loss when the item is derecognized.

### **3.8 Stated Capital**

#### **3.8.1 Ordinary Share Capital**

Ordinary Shares are classified as equity.

**3.9 Insurance contract liabilities**

**3.9.1 Insurance Provision – Life Insurance**

Life insurance liabilities are recognized when contracts are entered into and premiums are charged. These liabilities are measured by using the Gross Premium Valuation method as specified by the Insurance Regulatory Commission of Sri Lanka (IRCSL) based on the recommendation of the Independent Actuary.

The liability is determined as the sum of the discounted value of the expected future benefits, less the discounted value of the expected future premiums that would be required to meet the future cash outflows based on the valuation assumptions used. The liability is computed based on IRCSL specified guidelines and current assumptions which vary based on the contract.

Furthermore, adjustments are performed to capture the likely liabilities that may arise due to currently lapsed contracts reviving in the future.

**3.9.2 One Off Surplus Arising from Change in Policy Liability Valuation**

Based on the letter issued by the Insurance Regulatory Commission of Sri Lanka (IRCSL) dated 30 December 2016, all insurance companies have been instructed to maintain the one- off surplus arising from change in policy liability valuation as at 31/12/2015 within the long- term insurance fund/insurance contract liabilities identified separately. Accordingly, the one- off surplus is identified separately within the insurance contract liabilities as “Surplus created due to changes in valuation method from NPV to GPV” and will not be transferred/distributed until specific instructions are issued by IRCSL.

**3.10 Employee benefits**

**3.10.1 Short-term benefits**

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognized for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

**3.10.2 Defined contribution plans**

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution plans are recognised as an expense in profit and loss when incurred.

**Employee Provident Fund**

All employees of the Company are members of the Employees’ Provident Fund (EPF). The Company and employees contribute 12% and 8% respectively of the salary to EPF.

**Employees Trust Fund**

All employees of the Company are members of the Employees’ Trust Fund (ETF). The Company contributes 3% of the salary of each employee to ETF.

### 3.10.3 Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The defined benefit obligation is calculated annually by the Company, using internally generated method. The Company's net obligation in respect of defined benefit plan is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods. The assumptions based on which the results of the valuation were determined are included in the note 16 to the Financial Statements.

The Company has obtained an insurance policy to meet the future defined benefit obligation. Based on the insurance policy the Company has recognised its right to reimbursement as a separate asset. The insurance policy obtained is structured to meet the employee benefit obligation.

The Company recognizes all actuarial gains and losses arising from defined benefit plan in other comprehensive income and expenses related to defined benefit plans in staff expenses in profit or loss.

Provision has been made for retirement gratuities from the first year of service for all employees in conformity with the LKAS 19. However, under the payment of Gratuity Act No. 12 of 1983, the liability to an employee arises only on completion of 5 years of continued service.

### 3.11 Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

### 3.12 Capital Commitments and Contingencies

All discernible risks are accounted for in determining the amount of all known liabilities. Contingent liabilities are possible obligations whose existence will be confirmed only by uncertain future events or present obligations where the transfer of economic benefit is not probable or cannot be reliably measured. Contingent liabilities are not recognised in the Statement of Financial Position but are disclosed unless they are remote.

### 3.13 Revenue recognition

#### 3.13.1 Insurance Premiums

Gross written premiums on life insurance contracts are recognized as revenue when payable by the policyholder (policies within the 30 day grace period are considered as due). Any premiums received in advance is not recorded as revenue and recorded as liability until the premium is due. Benefits and expenses are provided against such revenue to recognize profits over the estimated life of the policies.

For single premium business, revenue is recognised on the date on which the policy is effective.

#### 3.13.2 Reinsurance premiums

Gross reinsurance premiums on insurance contracts are recognised as an expense on the earlier of the date when premiums are payable or when the policy becomes effective. Reinsurance premiums are decided based on rates agreed with reinsurers.

**3.14 Interest income**

Interest income is recognised in profit or loss using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash receipts or payments through the expected life of the financial asset or liabilities (or, where appropriate, a shorter period) to the carrying amount of the financial asset or liabilities. When calculating the effective interest rate, the Company estimates future cash flows considering all contractual terms of the financial instrument, but not future credit losses.

The calculation of the effective interest rate includes all transaction costs and fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability.

**3.15 Dividends**

Dividend income is recognised when the right to receive income is established. Usually this is the ex-dividend date for equity securities. Dividends are presented in net trading income or net income from other financial instruments at fair value through profit or loss based on the underlying classification of the equity investment.

**3.16 Reinsurance commission income**

Reinsurance commission income on outwards reinsurance contracts are recognised as revenue when receivable.

**3.17 Benefits, claims and expenses**

**3.17.1 Gross benefits and claims**

Claims by death and maturity are charged against revenue on notification of death or on expiry of the term. The interim payments and surrenders are accounted for only at the time of settlement.

Expenses on Life Insurance relates to the acquisition expenses and expenses for maintenance of Life Insurance business, investment related expenses not treated as a part of the capital cost of investment, etc which are accounted on accrual basis.

**3.17.2 Reinsurance claims recoveries**

Reinsurance claims are recognised when the related gross insurance claim is recognised according to the terms of the relevant contract.

**3.17.3 Acquisition Costs**

All acquisition cost are recognised as an expense when incurred.

**3.18 Other Expenses**

Other expenses are recognised on accrual basis. All expenditure incurred in the running of the business and in maintaining the property, plant and equipment has been charged to profit or loss.

### 3.19 Income Tax expense

Income tax expense comprises current and deferred tax. Current and deferred taxes are recognised in profit and loss except to the extent that it relates to items recognised directly in equity, where then it is recognised in equity.

#### 3.19.1 Current income tax

The Inland Revenue Department has issued Inland Revenue Act No. 24 of 2017 which replaced the Inland Revenue Act, No.10 of 2006. The new Act was effective from 01st April 2018. Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the Reporting date and any adjustment to tax payable in respect of previous years.

#### 3.19.2 Deferred tax

Deferred tax is provided using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax liabilities are recognised for all taxable temporary differences, except:

- Where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Current tax and deferred tax relating to items recognized directly in equity are also recognized in equity and not in the statement of profit or loss.

Deferred tax assets and liabilities are set off if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation

**3.20 Events Occurring after the Reporting Date**

All material subsequent events have been considered and where appropriate, adjustments or disclosures have been made in the respective notes to the Financial Statements.

**3.21 Comparative Information**

The comparative information is re-classified wherever necessary to conform with the current year's classification in order to provide a better presentation.

**3.22 Earnings Per Share (EPS)**

The Company presents basic (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period.

**3.23 Statement of Cash Flow**

The Cash Flow Statement has been prepared using the Indirect Method of preparing Cash Flows in accordance with the Sri Lanka Accounting Standard (LKAS) 7, Cash Flow Statements.

Cash and cash equivalents comprise short term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value. The cash and cash equivalents include cash in-hand, balances with banks and short- term deposits with banks.

For cash flow purposes, cash and cash equivalents are presented net of bank overdrafts.

**3.24 Standards Issued but Not yet Effective**

**3.24.1 Standards issued but not yet effective which may have an Impact**

The new and amended accounting standards issued up to date these financial statements are authorised for issue, but not yet effective for the current reporting period, are disclosed below. These Standards and amendments will be adopted, if applicable, when they become effective.

**SLFRS 17 Insurance Contracts**

**Scope**

SLFRS 17 applies to all types of insurance contracts—including life, non-life, direct insurance, and reinsurance—regardless of the type of entity that issues them. The Standard also covers certain financial guarantees and financial instruments that contain discretionary participation features. However, a limited number of scope exceptions apply.

**Key requirements**

The overall objective of SLFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. Unlike SLFRS 4, which largely relied on grandfathered local accounting policies, SLFRS 17 introduces a comprehensive and consistent model that addresses all key aspects of insurance contract accounting.

The core of SLFRS 17 is the general measurement model, supported by:  
• The variable fee approach (VFA): an adaptation for contracts with direct participation features.

- The premium allocation approach (PAA): a simplified method primarily intended for short duration contracts.

The key features of SLFRS 17's insurance contract accounting model include:

- *Fulfilment cash flows*: Measurement of the present value of future cash flows, including an explicit risk adjustment, remeasured at every reporting date.
- *Contractual Service Margin (CSM)*: A liability representing unearned profit, equal and opposite to any day-one gain in the fulfilment cash flows of a group of contracts. It is recognised in profit or loss as insurance services are provided over the coverage period.
- *CSM adjustments*: Certain changes in expected future cash flows are offset against the CSM and recognised in profit or loss over the remaining coverage period
- *Discount rate effects*: Changes in discount rates are recognised either in profit or loss or in other comprehensive income, based on the entity's accounting policy choice
- *Revenue and expense presentation*: Insurance revenue and service expenses are presented based on the concept of services provided during the reporting period
- *Non-distinct investment components*: Amounts payable to policyholders regardless of an insured event are excluded from the income statement and recognised directly on the balance sheet.
- *Separate presentation of results*: Insurance service results (earned revenue minus incurred.
- *Reinsurance loss-recovery component*: A loss-recovery asset is recognised in profit or loss when reinsurance covers losses from onerous underlying contracts and is subsequently remeasured as recoveries occur.
- *Balance sheet presentation*: Entities must separately present portfolios of insurance contracts issued that are assets and those that are liabilities; the same applies to reinsurance portfolios held.
- *Enhanced disclosures*: Extensive disclosures are required on recognised amounts and nature
- and extent of risks arising from insurance contracts

#### Transition

SLFRS 17 is effective for annual reporting periods beginning on or after 1 January 2026, with comparative figures required.

#### Estimated impact of the adoption of SLFRS 17

The Company is in the process of assessing and finalizing its accounting policies, transition approach including the impact on comparative information and the implications for current practices, as well as determining the appropriate implementation methodology. Consequently, the financial impact of the initial application of SLFRS 17 has not been disclosed in these financial statements, as it is not yet reasonably estimable.

### SLFRS 9 Financial Instruments

SLFRS 9 replaced LKAS 39 Financial Instruments: *Recognition and Measurement* for annual periods beginning on or after 1 January 2018. However, the Company / Group elected, under the amendments to SLFRS 4 to apply the temporary exemption from SLFRS 9, deferring the initial application date of SLFRS 9 to align with the initial application of SLFRS 17.

#### Classification and measurement

SLFRS 9 requires all financial assets—other than equity instruments and derivatives—to be evaluated based on both the entity's business model for managing those assets and the contractual cash flow characteristics of the instruments. The measurement categories under LKAS 39 have been replaced with the following: *Fair Value through Profit or Loss (FVPL)*, *Fair Value through Other Comprehensive Income (FVOCI)*,

*and Amortised Cost*.

#### Impairment

SLFRS 9 will fundamentally change the loan loss impairment methodology. The standard replaces the incurred loss model under LKAS 39 with a forward-looking Expected Credit Loss (ECL) approach. Under SLFRS 9, it is required to recognise an allowance for expected credit losses on all loans and other debt instruments not measured at fair value through profit or loss, as well as on loan commitments and financial guarantee contracts.

The impairment model under SLFRS 9 is based on a three-stage approach.

- **Stage 1:** For financial assets that have not experienced a significant increase in credit risk since initial recognition, impairment is measured based on a 12-month Expected Credit Loss (12-month ECL). This represents the portion of lifetime expected losses that result from default events possible within the next 12 months.
- **Stage 2:** Under SLFRS 9, financial assets are classified into Stage 2 when there has been a significant increase in credit risk since initial recognition. For these assets, it is required to recognise a loss allowance based on lifetime Expected Credit Losses (lifetime ECL).
- **Stage 3:** Financial assets are categorized into Stage 3 when there is objective evidence that the asset is credit-impaired. For Stage 3 assets, impairment continues to be measured based on lifetime ECL, and interest income is generally recognised on a net-carrying-amount basis, reflecting the credit-impaired status of the asset.

#### Hedging

SLFRS 9 introduces a more principles-based and risk-management-aligned hedge accounting model compared with LKAS 39. It aims to reflect an entity's actual risk management activities in its financial statements

#### Estimated impact of the adoption of SLFRS 9

The Company is in the process of evaluating the impact. Consequently, the financial impact of the initial application of SLFRS 9 has not been disclosed in these financial statements, as it is not yet reasonably estimable.

### SLFRS 18 Presentation and Disclosure in Financial Statements

SLFRS 18, which replaces LKAS 1, introduces significant enhancements to the way financial information is organized and communicated. The standard establishes new categories and subtotals in the statement of profit or loss to improve consistency and comparability across entities. It also requires entities to disclose *management-defined performance measures* (as specified in the standard), together with clear explanations and reconciliations. In addition, SLFRS 18 introduces strengthened requirements regarding the location, aggregation, and disaggregation of financial information. These changes are designed to ensure that financial statements present information more transparently and in a way that enhances users' understanding of an entity's financial performance and position.

SLFRS 18, and consequential amendments to the other accounting standards, are effective for annual reporting periods beginning on or after 1 January 2027. Early application is permitted.

The potential impact of SLFRS 18 on the financial statements and the related notes is currently being identified and evaluated.

- **SLFRS 19 Subsidiaries without public accountability: Disclosures**

SLFRS 19 introduces reduced disclosure requirements for subsidiaries that do not have public accountability but continue to apply the full SLFRS recognition and measurement principles.

The purpose of SLFRS 19 is to lessen the financial reporting burden on qualifying subsidiaries by simplifying disclosure requirements, while still ensuring that financial statements remain high-quality, consistent, and comparable for users.

SLFRS 19 applies to Specified Business Enterprises, as defined in the *Sri Lanka Accounting and Auditing Standards Act No. 15 of 1995*. Subsidiaries that fall within this category and do not have public accountability are eligible to apply SLFRS 19.

The Standard becomes effective for annual reporting periods beginning on or after 1 January 2027. Early application is permitted.

- **Classification and Measurement of Financial Instruments - Amendments to SLFRS 9 and SLFRS 7**

The amendments introduce enhancements to the classification, measurement, derecognition, and disclosure requirements for financial instruments. Their objective is to strengthen transparency, promote greater consistency in financial reporting, and respond to emerging market developments - particularly features such as sustainability-linked terms and nature-dependent electricity contracts.

These amendments are effective for annual reporting periods beginning on or after 1 January 2026. Early application is permitted.

- **Annual improvements to Sri Lanka Accounting Standards**

Narrow scope amendments as part of its periodic maintenance of Sri Lanka Accounting Standards will be adopted, if applicable, when they become effective.

**4. MANAGEMENT OF INSURANCE AND FINANCIAL RISK**

**4.1 Introduction and Overview**

The Company has implemented a risk management framework in order to identify, measure, mitigate and manage the various risks falling within credit, liquidity, market, operational and insurance categories. Risk reporting entails not only accounting but also the activities of risk management. The disclosures in the risk report largely adopt an economic view.

The Company has exposure to the following risks;

- Insurance risk
- Financial risk
  - ✓ Credit risk
  - ✓ Liquidity risk
  - ✓ Market risk
  - ✓ Operational risk

This section deals in detail with the various risks from insurance contracts and describe uncertainties in measuring them. In accordance with the requirements of SLFRS 4, the effects of a change in the assumptions underlying the measurement of insurance contracts and / or in the market environment are also quantified. In relation to financial instruments, SLFRS 7 stipulates that the disclosures must comprise information on the maximum credit risk exposure, the remaining terms, the rating, and a sensitivity analysis regarding the market risk. This information is also relevant for assessing the risk stemming from financial instruments.

**4.2 Insurance Risk**

By the very nature of an insurance contract, risk is based on fortuity and is therefore unpredictable. The risk under any insurance contract is the possibility that the insured event occurs and the uncertainty regarding the amount of the resulting claim.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Company faces is that the actual claim and benefit payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insurance events are random, and the actual number and amount of claims and benefits will vary from year to year from the level established using statistical techniques.

**Table A: Risk management procedures adopted by the Company to manage insurance risk**

Area	Risk management procedure
Underwriting discipline	<ul style="list-style-type: none"> <li>• Limits are set on underwriting capacity, and authority granted to individuals based on their specific expertise.</li> <li>• Only registered laboratories are used when obtaining medical reports and medical reports are sent to General Insurance Corporation (Re-Insurer) when the sum assured is above the threshold determined in the agreement.</li> <li>• Appropriate pricing guidelines have been set, with a focus on consistent technical pricing across the organization.</li> </ul>

Area	Risk management procedure
<p><b>Reinsurance</b>                      The Company obtains reinsurance to limit its exposure to individual risks and aggregation of risks arising from individual large claims and catastrophe events. The types of reinsurance obtained are as follows;</p> <ul style="list-style-type: none"> <li>✓ Excess of loss reinsurance obtained to protect a range of individual inwards contracts which could give rise to individually large claims.</li> <li>✓ Facultative reinsurance obtained to reduce risk relating to an individual specific inwards contract.</li> </ul>	<ul style="list-style-type: none"> <li>• Review adequacy of reinsurance support for catastrophe / extreme events on a regular basis.</li> <li>• Re- Insurance is done with the General Insurance Corporation of India.</li> </ul>
<p><b>Claims</b>                      The possibility of adverse variance in claim pattern of the product which is not expected at the product development stage.</p>	<ul style="list-style-type: none"> <li>• Obtaining adequate reinsurance cover.</li> <li>• Adequate information is gathered to confirm the event occurred prior to processing the claim.</li> <li>• Management closely monitors claim reserves.</li> </ul>

#### 4.3 Life Insurance Contracts

##### *Concentration risk*

The Company defines concentration risk in the life business as the risk of exposure to increased losses associated with inadequately diversified portfolios of assets and /or obligations.

A more diversified portfolio of risks is less likely to be affected across the board by a change in any subset of risks.

Any potential change in the mix of the portfolio could significantly alter the nature of the overall risk. Hence the Executive Committee reviews risks inherent in all new business propositions against the risk appetite of the life business.

##### Risk Management–

Life insurance products include protection and annuity covers.

Protection product scarry mortality, longevity and morbidity risks as well as market and credit risk. The most significant factors that could increase the frequency of mortality claims are epidemics, such as strains of influenza, or lifestyle changes such as eating, drinking and exercise habits, resulting in earlier or more claims than expected. Morbidity claims experience would not only be affected by the factors mentioned above, but because disability is defined in terms of the ability to perform an occupation, it could also be affected by economic conditions. In order to reduce cross-subsidies in the pricing basis, premiums are differentiated, where permitted, for example by product, age, gender and smoker status. The policy terms and conditions and the disclosure requirements contained in insurance applications are designed to mitigate the risk arising from non-standard and unpredictable risks that may result in severe financial loss.

In the life annuity business, the most significant insurance risk is continued medical advances and improvement in social conditions that lead to increase in longevity. Annuitant mortality assumptions include allowance for future mortality improvements.

In addition to the specific risks listed above, the Company is exposed to policy holder behavior and expense risks. Policyholder behavior risk is mitigated by product designs that match revenue and expenses associated with the contract as closely as possible. Expense risk is mitigated by careful control of expenses and by regular expense analyses and allocation exercises.

Certain life insurance contracts contain guarantees for which liabilities have been recorded for additional benefits and minimum guarantees.

The Company is exposed to two main types of concentration risks in its life business:

- **Market risk:** Interest rate guarantees expose the Company to financial losses that may arise as a result of adverse movements in financial markets.
- **Insurance risk:** Main factors include mortality risk, morbidity risk, longevity risk, policyholder behavior risk (lapse, anti-selection) and expense risk.

Accordingly having a well-diversified portfolio of products reduces risk associated with the life business.

The Company's exposure to life insurance risks varies significantly by the product lines and may change over time.

The insurance risk described above is also affected by the contract holder's right to pay reduced premiums or no future premiums, to terminate the contract completely or to exercise guaranteed annuity options. As a result, the amount of insurance risk is also subject to contract holder behavior.

**Table B: Concentration risk within the life insurance business**

Description	Insurance contract liabilities As at 31 December 2025 (Rs'000)	Insurance contract liabilities As at 31 December 2024 (Rs'000)
Participating	2,144,351	1,931,202
Non-participating	2,389,904	2,024,199
Life insurance fund-Surplus Created due to Change in Valuation	109,043	109,043
<b>Total</b>	<b>4,643,298</b>	<b>4,064,444</b>

**Assumptions in Determining Life Insurance Contract Liabilities**

Life insurance contracts, estimates are made in two stages. At inception of the contract, the Company determines assumptions in relation to future deaths, voluntary terminations, investment returns and administration expenses. Subsequently, new estimates are developed at each reporting date to determine whether liabilities are adequate in the light of the latest current estimates. Improvements in estimates have no impact on the value of the liabilities and related assets, while significant enough deteriorations in estimates have an impact.

**Sensitivity Analysis**

The table C presents the sensitivity of the value of insurance liabilities disclosed in this note to movements in the assumptions used in the estimation of insurance liabilities. For liabilities under life insurance contracts with fixed and guaranteed terms, changes in assumptions will not cause a change to the amount of the liability, unless the change is severe enough to trigger a liability adequacy test adjustment.

No adjustments were required in 2025 or 2024, based on the results of the liability adequacy test. The table C indicates the level of the respective variable that will trigger an adjustment and then indicates the liability adjustment required as a result of a further deterioration in the variable.

**Table C: Sensitivity of the value of insurance liabilities for the year ended 31 December 2025**

Assumption	Change in assumptions	Impact on liabilities
Mortality	+10%	100.10%
	-10%	99.89%
Discount rate	+50 basis points	98.28%
	-50 basis points	101.78%

#### 4.4 Financial Risk

##### 4.4.1 Introduction and overview

The Company is exposed to a range of financial risks through its;

- Financial assets
- Financial liabilities
- Reinsurance receivable and
- Insurance liabilities

In particular, the key financial risks are exposed if investment proceeds are not sufficient to fund the obligations arising from insurance contracts. The key risk categories are;

- Credit risk
- Liquidity risk
- Market risk
- Operational risk

##### 4.4.2 Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss to the other party by failing to discharge an obligation. The Company's credit risk could mainly arise from;

- Financial investments in debt securities
- Reinsurance receivable
- Premiums receivable
- Life policyholders and others
- Cash and cash equivalents and
- Other financial receivables

The Company manages credit risk exposure within parameters that reflect the Company's strategic objectives and risk tolerance. Sources of credit risk are identified, assessed and monitored, and the Company has policies to manage the specific risks within the various subcategories.

**Credit Risk Exposure**

The Company's exposure to credit risk as at the balance sheet date is given in table D with the comparative figures and has been derived as per the company risk management policy of using the carrying values in the statement of financial Positions.

**Table D: Credit risk exposure**

As at 31 December	2025 Rs.'000	% of Allocation	2024 Rs.'000	% of Allocation
<b>Financial Investments</b>				
Debt securities - Held to maturity	2,363,895	42.13%	1,330,709	38%
Debt securities - Loans and Receivables	2,813,160	50.13%	1,757,735	50%
Debt securities - Available for sale	434,415	7.74%	434,676	12%
<b>Total debt securities</b>	<b>5,611,471</b>	<b>100%</b>	<b>3,553,120</b>	<b>100%</b>
Life Policyholders loans	69,062	19.76%	74,362	46%
Premiums receivable	15,595	4.46%	19,038	12%
Other financial assets	70,854	20.27%	67,907	42%
Cash and cash equivalents	194,031	55.51%	1,328	1%
<b>Total credit risk exposure</b>	<b>349,542</b>	<b>100%</b>	<b>162,635</b>	<b>100%</b>

The Company is exposed to credit risk on securities issued by third parties. The Company limits its exposure by analyzing the creditworthiness of each debt security investment. The credit worthiness of a potential debt security investment is assessed mainly through ratings assigned to the issuing institution or the ratings assigned to an issue. The debt security investments are broadly categorized into investments in government securities and investments in corporate debt securities.

**Table E: Credit risk - financial investments in Debt securities**

As at 31 December	2025		2024	
	Rs.000	% of total	Rs.000	% of total
Government securities and related institutions	2,798,311	84.18%	1,765,386	90%
Corporate debt securities.	525,626	15.82%	190,793	10%

**Table F: Corporate debt security allocation - credit rating wise**

As at 31 December Rating	2025		2024	
	Rs.000	% of total	Rs.000	% of total
AA	69,155	13.15%	30,934	16%
A+	-	-	21,060	11%
A	36,622	6.97%	29,043	15%
A-	369,429	70.29%	109,755	57.52%
BBB+	50,419	9.59%	-	-
<b>Total</b>	<b>525,625</b>	<b>100%</b>	<b>190,793</b>	<b>100%</b>

**4.4.3 Credit risk relating to Reinsurance Receivable**

As part of its overall risk management strategy, The Company cedes insurance risk through proportional, non-proportional and specific risk reinsurance treaties. While these mitigate insurance risk, the recoverable from reinsurers and receivables arising from ceded reinsurance exposes the Company to credit risk.

Reinsurance is placed in line with policy guidelines approved by the Board of Directors on an annual basis in line with the guidelines issued by the Insurance Board of Sri Lanka and concentration of risk is managed by reference to counterparties' limits that are set each year and are subject to regular reviews.

**4.4.4 Credit Risk relating to Loans to Life Policyholders and Others**

The credit risk exposure arising from loans granted to policyholders, staff and field staff are as follows;

**Table G**

Loan category	2025 (Rs.'000)	2024 (Rs.'000)
Policyholders	69,062	74,362
Staff loans	6,414	14,612
Loans to agents	571	335
<b>Total</b>	<b>76,047</b>	<b>89,309</b>

A loan issued by an insurance company considers the surrender value of the life policy as collateral. As at the reporting date, the value of policy loans granted amounted to Rs.2.65 million (2024 -Rs.17.13 million).

The Company grants loan facilities to staff including field staff after a robust process of evaluating the credit worthiness of the individual, value of the facility and the related collateral.

**4.4.5 Credit Risk relating to Cash and Cash Equivalents**

The Company held cash and cash equivalents of Rs. 174.1Mn as at 31December 2025 (2024: Rs.1.3Mn overdraft), which presents its maximum credit exposure on these assets.

**4.5 Liquidity Risk**

Liquidity risk is the risk that the Company may not have sufficient liquid financial resources to meet its obligations when they fall due or would have to incur excessive costs to do so. In respect of catastrophic/unexpected large claim events there is also a liquidity risk associated with the timing differences between gross cash outflows and expected reinsurance recoveries.

The following policies and procedures are in place to mitigate the exposure to liquidity risk:

- The Investment Committee manages this risk by diversifying investment durations and reviewing cash flow projections regularly.
- Guidelines are set for asset allocations, portfolio limit structures and maturity profiles of assets, in order to ensure availability of sufficient funding to meet insurance and investment contract obligations.
- Reinsurance contracts contain clauses permitting the immediate draw down of funds to meet claim payments should claim events exceed a certain size.

#### Maturity Profiles

The table H summaries the maturity profiles of non-derivative financial assets and financial liabilities based on remaining undiscounted contractual obligations, including interest payable and receivable.

For insurance contracts liabilities and reinsurance receivables, maturity profiles are determined based on estimated timing of net cash outflows from the 34 recognized insurance liabilities.

**Table H: Maturity Profile**

**4.6 Market Risk**

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risks:

- Equity price risk
- Foreign exchange risk and
- Interest rate risk

Exposure to market risk on these products is limited to the extent that income arising from asset management charges is based on the value of assets in the fund.

**4.6.1 Equity Price Risk**

Listed equity securities are susceptible to market price risk arising from uncertainties of future values of the investment securities. The Company manages the equity price risk through diversification and placing limits on individual and total equity portfolio investments. The Company's equity risk management policies are;

- Equity investment decisions are based on fundamentals rather than on speculation.
- Decisions are based on in depth macroeconomic and industry analysis as well as research reports on company performance.

The risk exposure to listed equity securities as at 31<sup>st</sup> December 2025 with the comparatives are as follows;

**Table I: Listed Equity Investment**

Segment	2025 Rs.'000	2024 Rs.'000
Investment in equity shares	284,254	214,990
<b>Total</b>	<b>284,255</b>	<b>214,990</b>

The Company has no significant concentration of equity price risk as it has a diversified portfolio. The table J shows the sector diversity of quoted equity investments of the Company.

**Table J: Portfolio diversification of equity investments**

Sector	2025		2024	
	Rs.'000	%of total	Rs.'000	%of total

**Table K: Sensitivity**

The following table demonstrates the sensitivity of the Company's equity portfolio.

2025	5% increase in market price	5% decrease in market price
	P&L Impact (Rs)	P&L Impact (Rs)
Financial assets held for Trading	14,212,760	(14,212,760)
2024	5% increase in market price	5% decrease in market price
	P&L Impact (Rs)	P&L Impact (Rs)
Financial assets held for Trading	10,749,522	(10,749,522)

#### 4.6.2 Foreign Exchange Risk

Currency risk is the risk of loss resulting from changes in exchange rates. The Company's principal operation is based in Sri Lanka, therefore it is not exposed to the financial impact arising from changes in the exchange rates of various currencies.

#### 4.6.3 Interest Rate Risk

Interest rate risk is the risk of fluctuation of the value or cash flows of an instrument due to changes in market interest rates.

The Company has adopted the following policies to manage interest rate risk.

- The Investment Committee members keep a regular track of macroeconomic scenarios and their likely impact on interest rates
- Initial recognition of investments is closely monitored

Floating rate instruments expose the company to cash flow fluctuations, whereas fixed interest rate instruments expose the Company to changes in fair values.

As at 31 December 2025 there were no cash flow interest rate exposures, as the Company did not have any floating rate investments. However, The Company is exposed to fair value fluctuations on fixed rate investments which are measured at fair value.

#### 4.7 Operating Risk

Operational risk is the risk of loss arising from system failure, human error, fraud or external events. When controls fail to perform, Operational risks can cause damage to reputation, have legal or regulatory implications or can lead to financial losses. The Company cannot expect to eliminate all operational risks, but by initiating a rigorous control framework and by monitoring and responding to potential risks, the Company is able to manage the risks.

Controls to manage the Operational Risk includes effective segregations of duties, access controls, authorization and reconciliation procedures, staff education and assessment processes, including the use of internal audit. Business risk such as changes in environment, technology and the industry are monitored through the Company's strategic planning and budgeting process.

**4.7.1 Regulatory capital - Risk Based Capital (RBC) Framework**

As a regulator of the industry, Insurance Regulatory Commission of Sri Lanka has implemented a Risk Based Capital (RBC) Framework to monitor insurance companies in the country.

This framework, based on emerging international standards and good practices in developed countries, is risk focused. It reflects the relevant risks that the insurance companies face. The minimum capital prescribed under the framework, which includes a consistent approach to the valuation of assets and liabilities, will serve as an effective buffer to absorb losses. With greater transparency, it will facilitate comparisons across insurance companies. It will also provide clearer information on the financial strength of the Company.

Risks involved in order to comply with new RBC Framework

- Changing business strategy to align with the new regulatory environment
- Increase in compliance cost Risk response to capital management
- In preparation for the adoption of the RBC Framework, the Company already uses appointed actuaries service.
- Closely follow up RBC guideline issued by IRCSL.

Summary of Company's compliances to the RBC framework describe as following table.

As at 31 December	2025 (Rs 000')	2024 (Rs 000')
Total Available Capital	2,361,386	505,182
Risk Based Capital Requirement	725,612	379,177
Risk Based Capital Adequacy Ratio	325%	133%
Minimum Capital Requirement	500,000	500,000
Capital Adequacy Satisfied	Yes	Yes

Quarterly summary of Company's compliances to the RBC framework describe as following table.

As at 31 December	Q 1 (Rs 000')	Q 2 (Rs 000')	Q 3 (Rs 000')	Q 4 (Rs 000')
Total Available Capital	465,383	2,428,221	2,465,445	2,361,386
Risk Based Capital Requirement	371,466	714,296	848,212	725,612
Risk Based Capital Adequacy Ratio	125%	340%	291%	325%
Minimum Capital Requirement	500,000	500,000	500,000	500,000
Capital Adequacy Satisfied	No	Yes	Yes	Yes

**4.8 Current economic condition**

As at 31st December 2025, Sri Lanka recorded a headline inflation rate of 2.1% year-on-year, as measured by the Colombo Consumer Price Index (CCPI). This reflects a period of low and stable inflation, supported by a favourable statistical base effect, despite a noticeable month-on-month increase in prices during December due to disruptions caused by Cyclone Ditwah. Food inflation remained unchanged at 3.0%, while non-food inflation increased to 1.8%, indicating mild price pressures within the economy.

In this challenging economic environment, the Company has implemented several strategic measures to safeguard its business continuity and ensure ongoing operations:

- Reviewed its product portfolio and initiated the process of replacing loss-making products with non-par products to enhance profitability. Additionally, a special revival campaign was launched to reinstate lapsed policies, contributing positively to the overall income.

- Closely monitored branch performance and implemented remedial actions to address underperforming locations.
- Reassessed the expense structure in light of rising commodity prices and implemented cost-cutting measures to maintain operational expenses at a bare minimum without compromising service delivery.
- Conducted continuous reviews of the investment portfolio, resulting in significant improvement in investment income through prudent and timely decisions.
- Undertook market analysis to understand customer behavior and emerging product trends. The Company remains vigilant to detect market changes and capitalize on new opportunities to optimize performance.
- The prevailing economic situation has adversely affected the Group Gratuity segment. A sharp decline in renewals and contributions was observed, as existing customers face financial constraints, and potential clients defer decision-making amid volatile interest rates.

Management remains committed to ensuring the Company's ability to continue as a going concern. The Company continuously evaluates macroeconomic indicators, business risks, and internal performance metrics to make informed decisions. These considerations are reflected in the assumptions and judgments used in preparing the financial statements.

7. INVESTMENT PROPERTY (Contd...)

7.1 Measurement of Fair Values

7.1.1 Fair Value Hierarchy

The carrying amount of investment property is the fair value of property as determined by an external, independent property valuer, having an appropriate recognized professional qualification and recent experience in the location and the category of the property being valued. Fair values were determined having regard to recent market transactions for similar properties in the same location as the Company's investment properties.

The fair value measurement for the investment properties has been categorised as a Level 3 fair value based on the inputs to the valuation technique used.

Valuation technique and significant unobservable inputs

Address	Extent	Name of the Valuer	Market Value Rs.	Date of the valuation
LIC Tower, No 34-36, Sir Vaithiyalingam Thuraisamy Road, Jaffna	Land - 30.1P Building - 29,982 Sqft	Mr S Jeganathan B.Sc (Special) E.M.V (SL) F.I.V (SL)	Land - per perch Rs. 4,000,000/- Building - per average sqft Rs. 16,797	31-Dec-25

Valuation technique and significant unobservable inputs

Description	Fair value as at 31st December 2025	Valuation technique	Significant unobservable inputs	Inter-relationship between key unobservable inputs and fair value measurement
Land	120,400,000	Market Comparable Approach	Outgoings RRIM - 10% Capitalisation - 6% Rent per sqft.	The estimated fair value would increase / decrease if Repairs was lower / higher Rates was higher / lower Insurance was lower / higher Capitalisation rate was lower / higher
Building	503,600,000

The Company made an assessment of the recoverability of the loans to life policy holders as at 31 December 2025. As a result, it was concluded that no provision for impairment is required.

# Life Insurance Corporation (Lanka) Limited

## NOTES TO THE FINANCIAL STATEMENTS

Year ended 31 December 2025

11. PREMIUM RECEIVABLES	Note	2025 Rs.	2024 Rs.
Premium receivables	11.1	18,325,852	21,767,752
Provision for premium receivables	11.2	(2,730,074)	(2,730,074)
		<u>15,595,778</u>	<u>19,037,678</u>

### 11.1 Premium receivables

The Company has opted to record the life insurance premium on an accrual basis in accordance with SLFRS 4 - Insurance Contracts from 1 January 2014. The life insurance premiums for policies within the 30 days grace period are considered as due premium, subject to a provision for premium default. Premium default ratio is computed by analyzing the default history.

### 11.2 Impairment losses on premium receivables

The Board of Directors has assessed potential impairment loss of premium receivables as at 31 December 2025. Based on the assessment, adequate impairment provision has been made in the financial statements as at the reporting date in respect of premium receivable.

Life Insurance Obligation -31 December		4,643,298,855	4,064,444,622
Charge to profit or loss		<u>578,854,233</u>	<u>800,440,835</u>

The valuation of the Life Insurance fund as at 31 December 2025 was performed by M/S K.A.Pandit (Consultants & Actuaries). In accordance with the Consultant Actuary's report, the reserve for the year amounted to Rs.4,643 Million (2024 - Rs.4,064 Million). In the opinion of the Consultant Actuary, the reserve is adequate to cover the liabilities pertaining to the Life Insurance business.

The actuary has estimated that the solvency margin required (including the solvency margin for the new reversionary bonus allotted as at 31 December 2025 under the regulation of Insurance Industry Act, No. 43 of 2000 as Rs.4,643 Million.

As approved by the actuary, the Company has a Risk Based Capital Adequacy Ratio of 325% (2024 - 133%)

**15.3.a** The assumptions used for the insurance contracts disclosed in this note are as follows;

Assumption	Description
Mortality	The Mortality table used was the A67/70 (60%) ultimate for all assurances and deferred annuities before vesting and, a (90%) ultimate table of annuitants vesting.
Investment returns	Investments returns affect the assumed level of future benefits due to the contract holders and the selection of discount rate set out by IRCSL.

**15.3.b Liability adequacy testing (LAT)**

A Liability adequacy test ("LAT") for Life Insurance contract liability was carried out by M/S K.A.Pandit (Consultants & Actuaries) as at 31 December 2025 as required by SLFRS 4 - Insurance Contracts. When performing the LAT, the Company discounted all contractual cash flows and compares this amount with the carrying value of the liability. According to the consultant actuary's report, assets are sufficiently adequate as compared to the discounted cash flow for the year in contrast to the reserves as at 31 December 2025. No additional provision was required against the LAT as at 31 December 2025.

Life Insurance Corporation (Lanka) Limited  
**NOTES TO THE FINANCIAL STATEMENTS**  
Year ended 31 December 2025

**16. EMPLOYEE BENEFIT OBLIGATION**

	<b>2025</b>	<b>2024</b>
	<b>Rs.</b>	<b>Rs.</b>
<b>16.1 Defined contribution plans</b>		
Balance as at 1 January	35,308,689	25,004,689
Current service cost	3,106,489	2,386,165
Interest charge for the year	3,244,067	2,956,458
Actuarial (Gain) / Loss	2,667,498	5,696,455
Payments during the year	(5,736,031)	(735,078)
	<u>38,590,712</u>	<u>35,308,689</u>
<b>Expenses on defined benefit obligation</b>		
<b>Recognised in profit or loss</b>		
Current service cost	3,106,489	2,386,165
Interest cost	3,244,067	2,956,458
	<u>6,350,556</u>	<u>5,342,623</u>
<b>Recognized in other comprehensive income</b>		
Defined benefit plan actuarial (gains)/losses	2,667,498	5,696,455
	<u>2,667,498</u>	<u>5,696,455</u>

As at 31 December 2025, the gratuity liability was actuarially valued under the Projected Unit Credit (PUC) method by M/S Prime Actuaries (Consultants & Actuaries) as required by Sri Lanka Accounting Standard (LKAS) 19 - Employee Benefits.

<b>16.2 Principal assumptions as at reporting date</b>	<b>2025</b>	<b>2024</b>
Discount rate as at 31 December	10.50%	10.00%
Future Salary increase	11.00%	10.00%
Retirement age (years)	60	60

**16.3 Sensitivity of assumptions used in actuarial valuation**

The following table demonstrates the sensitivity to a reasonably possible change in the key assumptions employed with all other variables held constant in the employment benefit liability measurement.

The sensitivity of the statement of profit or loss and other comprehensive income statement of financial position is the effect of the assumed changes in discount rate and salary increment rate on the profit or loss and employment benefit obligation for the year.

<b>2025</b>	<b>Change in assumption</b>	<b>Increase in assumption</b>	<b>Decrease in assumption</b>
Discount rate	1.00%	(3,256,710)	3,738,045
Salary increment rate	1.00%	3,684,400	(3,270,445)
<b>2024</b>	<b>Change in assumption</b>	<b>Increase in assumption</b>	<b>Decrease in assumption</b>
Discount rate	1.00%	(3,179,256)	3,678,346
Salary increment rate	1.00%	3,642,613	(3,206,460)

**26. TAX EXPENSES**

**26.3 Deferred taxation**

Deferred tax assets are recognized for unused tax losses and deductible temporary differences to the extent that is probable that future taxable profits will be available against which they can be used.

The Company is of the view that there will not be material temporary differences arising, which will result in a deferred tax liability.

Deferred tax assets and liabilities are off set when there is a legally enforceable right to off set tax assets against tax liabilities and when the deferred income taxes relate to the same fiscal authority.

**Recognised deferred tax asset/ (liabilities)**

as at,	Assets		Liabilities		Net	
	31.12.2025	31.12.2024	31.12.2025	31.12.2024	31.12.2025	31.12.2024
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Tax losses	-	32,713,102	-	-	-	32,713,102
	-	32,713,102	-	-	-	32,713,102

**Movement in temporary differences during the year**

	Balance as at	Recognised in		Balance as at
	01.01.2025	profit or loss	OCI	31.12.2025
	Rs.	Rs.	Rs.	Rs.
Tax losses	32,713,102	(32,713,102)	-	-
	32,713,102	(32,713,102)	-	-

**26.4 Un-recognized deferred tax assets**

The breakdown of un-recognized deferred tax assets is given below;

	2025	2024
	Rs.	Rs.
On tax Losses	-	190,224,483
Total	-	190,224,483

**27. BASIC EARNINGS/(LOSS) PER SHARE**

	2025	2024
	Rs.	Rs.
Profit/(Loss) for the year	(265,250,413)	(623,843,768)
Weighted average number of shares in issue	330,333,333	167,833,333
<b>Basic earnings/(loss) per share (Rs.)</b>	<b>(0.80)</b>	<b>(3.72)</b>

**27.1 Weighted average number of ordinary shares**

	2025	2024
	No. of shares	No. of shares
No of shares at the beginning of the period	197,000,000	147,000,000
Add: weighted average number of shares issued	133,333,333	20,833,333
Weighted average number of shares as at 31 <sup>st</sup> December	330,333,333	167,833,333

The computation of the basic Earning/(Losses) per Share has been calculated based on net profit/(Loss) attributable to ordinary shareholders for the year divided by weighted average number of ordinary shares in issue as at the reporting date.

**28.3 Fair values of financial assets and liabilities carried at amortized cost**

The following table summarises the carrying amounts and the company's estimate of fair values of those financial assets and liabilities not presented on the Company's statement of financial position at fair value. The fair value in the table below may be different from the actual amounts that will be received or paid on the settlement or maturity of the financial instrument. For certain instruments, the fair value may be determined using assumptions which are not observable in the market.

As at 31 December		2025		2024	
		Carrying amount	Fair value	Carrying amount	Fair value
		Rs.	Rs.	Rs.	Rs.
<b>Financial assets</b>					
<b>Financial investments</b>

		<b>5,611,272,724</b>	<b>5,835,360,618</b>	<b>3,438,449,374</b>	<b>351,712,896</b>

Life Insurance Corporation (Lanka) Limited  
**NOTES TO THE FINANCIAL STATEMENTS**  
 Year ended 31 December 2025

**28. FINANCIAL ASSETS AND LIABILITIES (Contd...)**

Given below is the basis adapted by the company in order to establish the fair values of the financial instruments which are shown above.

**28.4.a Financial investments**

- Reverse repurchase agreements

The fair values of money market placements and reverse repurchase agreements with maturity of less than one year approximate their carrying amounts due to the relatively short maturity of the financial instruments.

- Financial investments held-to-maturity

The fair values of financial investments held-to-maturity are estimated based on current market yields.

- The fair values of listed debentures are calculated based on published market prices. The fair value of unlisted variable rate debentures equals carrying value due to inability to reliably predict future cash flows and unlisted fixed rate corporate debts are based on discounted cash flow method using current market yields of treasury bonds or treasury bills for similar maturity plus A risk premium determined based on the credit rating of the instrument.

- The fair value of term deposits have been ascertained to be equal to the amortised cost.

**27.4.b** Cash and balances with banks – The carrying amount of cash and bank balances approximate fair value due to the relatively short maturity of the financial instruments.

**27.4.c** For all the other items the carrying value has been considered as the fair value due to the short term nature of the cash flows.

**30. RELATED PARTY TRANSACTION**

**30.1 Transactions with key management personnel**

The board of directors of the Company have the authority and responsibility of planning, directing and controlling the activities of the Company. Accordingly, the Board of directors of the Company have been identified as the key management personnel ("KMP") of the Company.

The emoluments paid to the KMP of the Company are disclosed as follow.

	<b>2025</b>	<b>2024</b>
	<b>Rs.</b>	<b>Rs.</b>
Short term employee benefits	38,049,444	39,534,321
Post employment benefits	Nil	Nil

Fees and remunerations paid to directors are disclosed in note 25.

**30.2 Transactions with related parties**

The Company carried out transactions in the ordinary course of its business with parties who are defined as related parties in LKAS 24 "Related Party Disclosures". The details are as follows:

Company	Relationship	Nature of Transaction	Transaction amount 2025 (Rs.)	Transaction amount 2024 (Rs.)
Bartleet Religare Securities (Pvt) Ltd	Affiliated to a shareholder	Brokerage Fee	5,627,821	2,584,148
		Receivable / (P'ble)	(494,114)	1,217,061
LIC India	Parent	Share Advance	-	-
		Receivable / (P'ble)	(71,340,000)	-

All outstanding balances with these related parties are priced on arm's length basis.

**Life Insurance Corporation (Lanka) Limited**  
**NOTES TO THE FINANCIAL STATEMENTS**

Year ended 31 December 2025

**31. COMMITMENTS**

As at the year end, there were no capital expenditure approved by the Board and contracted for which require a provision in the Financial Statements.

**32. EVENTS OCCURRING AFTER THE REPORTING DATE**

There are no significant events that have occurred since the reporting date which would require adjustments to or disclosures in the financial statements.

**33. CONTINGENCIES**

In the opinion of the Directors, and in consultation with the Company Lawyers, litigation currently pending against the Company would not have a material impact on the reported financial position of the Company.

All pending litigations for claims have been evaluated and adequate provisions have been made in these Financial Statements where necessary.

**34. GOING CONCERN**

The Company has recorded accumulated losses of Rs.2,056,921,799 (2024 - Rs.1,789,003,888 ) as at 31 December 2025. The Company has also incurred a net loss of Rs.265,250,413 (2024- Rs.623,843,768) and recorded negative operating cashflows of Rs. 169,362,868 (2024 Rs. 267,164,663) for the year ended 31 December 2025. Further, the company maintained a Total Available Capital (TAC) of Rs. Five Hundred Million as at the year ended 31 December 2025 except for 1st quarters (Rs.465,383,000) as stipulated in the "Solvency Margin (Risk Based Capital) Rules 2015".

However, the Board of the Company are fully aware of the situation of the Company and took the following remedial actions so far in order to address the going concern difficulties and to stabilize the operations of the Company with the support of the Parent's company.

- We have reviewed the product portfolio and initiated the process of replacing loss-making products with non-par products to enhance profitability. Additionally, a special revival campaign was launched to reinstate lapsed policies, contributing positively to the overall income.
- We have closely monitored branch performance and implemented remedial actions to address underperforming locations.
- We have reassessed the expense structure in light of rising commodity prices and implemented cost-cutting measures to maintain operational expenses at a bare minimum without compromising service delivery.
- We have conducted continuous reviews of the investment portfolio, resulting in significant improvement in investment income through prudent and timely decisions.
- we have undertook market analysis to understand customer behavior and emerging product trends. The Company remains vigilant to detect market changes and capitalize on new opportunities to optimize performance.

With the aforementioned actions and events, the management is confident that the Company would be able to overcome these matters during the year 2026. Accordingly, the financial statements have been prepared on a going concern basis and there is no material uncertainty related to going concern. Directors are satisfied that the business has adequate resources to continue in operational existence for the foreseeable future.

**35. DIRECTORS' RESPONSIBILITY STATEMENT**

The Board of Directors is responsible for the preparation and presentation of these Financial Statements.
